

APPENDIX

Appendix I. Semi-structured interview guide

1. What is your name, position at the hospital, and your relationship to the simulation training program?
2. Tell me about how you first encountered simulation training at your hospital.
3. Tell me about your experiences with simulation training in the past.
4. What, if any, training did you receive in order to carry out your role in the simulation programs?
5. Is your hospital still continuing to carry out and implement the simulation program?
How frequently?
6. How have the simulations been going?
7. What are some things that make the simulations hard to carry out? What are some things that make it easier?
8. What changes, if any, would you implement in regard to the simulation program?
9. What would you do differently if you wanted to seed a simulation program? What would you do the same?
10. What makes a simulation good?
